The **STEADI - PLANK™** System

## **"C.A.R.S."**

### **Cable Assisted Retraction System**

The "C.A.R.S." Cable Assisted Retraction System for our fixed length boat boarding ramps and telescoping passerelles will allow you to raise the ramp from your vessel when you depart the dock and then retrieve the ramp back to a boarding position when you return to the dock. This is easy to do with the use of a boat hook or attached line. This system will counter balance our ramps from our PS-4, (4' ramp) to our PSE-99, (18' ramp). This system may be ordered with the aluminum mounting post, sized for your ramp, or without the mounting post. If our mounting post is not used, the C.A.R.S. retraction system may be mounted on a piling, pole, dock post or any other location that will yield the correct angle for the cable to reach the end of the ramp and retract it.

The RMK Sea Wall/Dock Cable Assisted Retraction System with aluminum mounting post has an MSRP of \$1,895.00 plus the cost of the ramp to be used with it.

The RRM Sea Wall/Dock Cable Assisted Retraction System w/o mounting post has an MSRP of \$1,195 plus the cost of the ramp to be used with it.
