Yacht Boarding Systems will be introducing several new products at the St Petersburg Boat Show Nov 29 to Dec 2, 2008. Booth# 137-138

A telescoping STEADI-PLANK™ ramp that will extend from 7' to 11' with two sections.

A manually deployed PASSERELLE style-boarding ramp. This Passerelle style ramp has a flat base for mounting on a swim/dive platform or vessel deck. It can swivel 180 degrees horizontally side in 15-degree increments and pivot up and down with the tide. It may be extended from 7' to 11' with its telescoping sections.

A vessel side mount for our fixed length ramps and the new telescoping ramps. This mount will allow you to support the telescoping or fixed length ramp from either side of your vessel and position the ramp forward, aft, or straight out from the side in 15-degree increments. (180 degrees swivel)

A cable assisted retraction system for dock mounted STEADI-PLANK™ ramps. (Also may be able to be used on some vessels) This system counter-balances the weight of the ramp to allow you to raise and lower the ramp with just one finger.

As with all of our products, the STEADI-PLANK™ ramps that you have already purchased can be upgraded to any of the above NEW products. When you purchase a STEADI-PLANK™ boarding ramp system, you can grow with us as our product line grows.

We will also introduce our NEW line of 33" wide wheelchair accessible boat boarding ramps.

Unsure about your first step..don't be..Use The STEADI-PLANK™ Boat Boarding Ramp System©!
