The Steadi-Plank™ system

The STEADI-PLANK™ Boat Boarding Ramp System®

We all know that "One Size" does not fit all. The same is true for portable boarding ramps. One length of ramp will not always work for the many docking situations you will encounter. Also, depending on the docking situation and changing tidal conditions, you may need to mount the boarding ramp different ways and from different locations on your yacht.

The STEADI-PLANK™ Boat Boarding Ramp System® will allow you the flexibility to handle most all of the dock and boarding situations that you will encounter. The STEADI-PLANK™ Boat Boarding Ramp System® is made of marine grade aluminum, using the latest state of the art "space age" honeycomb core construction and bonding techniques. The STEADI-PLANK™ Boat Boarding Ramp System® is very versatile and can be re-configured and added to as your needs change. Thus assuring that your initial investment in the STEADI-PLANK™ Boat Boarding Ramp System® is secure. The fact that you do not have to discard what you have and start over when your boarding system needs change, makes the STEADI-PLANK™ Boat Boarding Ramp System® stand out from the others as a "**best buy**" value.

Unsure about your first step... don't be... Use the STEADI-PLANK™ Boat Boarding Ramp System®!
