PS and ELP series boat boarding ramps

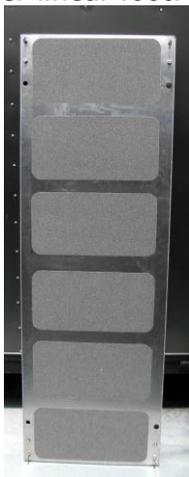

PS series ramp

The STEADI-PLANK™ PS series Boat Boarding Ramp System© include:

- Two (2) Stainless Steel "STEADI-PLANK™ Cam Mount"™ fixed Mounts
- Two (2) Stainless Steel Back Plates w/ Stainless Steel mounting bolts, and nuts
- Two (2) "STEADI-PLANK™ Mounting Forks"™ w/ mounting hardware
- One (1) UHMW End Glide Plate
- Two (2) UHMW Side Glide Pads
- Two (2) Stainless Steel Eye Ring Nuts.
- Rubber edge guard on all sides.
- Approximately 7 lbs. per linear foot.

ELP series ramp

Over the past several years, we have had request from boaters to provide them with an "entry-level" boarding ramp. They have told us that they do not need the mounting hardware. They just want to be able to lay the ramp between their vessel and a dock, sea wall, or between two vessels. We have listened to them and now offer our Entry-Level ELP series Steadi-Plank™ boarding ramps. These "Entry-Level" ramps are the same as our standard PS series ramps but without the mounting hardware. They may be upgraded to a full PS series Steadi-Plank™ at any time by the user in the field. Just purchase the PS-UG upgrade kit and install it.

Our standard optional handrail kit "HRK" will also work with the "ELP" series ramps.

Specifications are subject to change without notification.

unsure about your first step..don't be..Use The STEADI-PLANK™ Boat Boarding Ramp System©!
